Attention: Alissa Sugar, Project Officer
EA Project Coordination

Subject: Carp River Restoration Project Update

Dear Ms. Sugar:

The Ministry of Natural Resources has received and reviewed the draft Terms of Reference for the third-party review of the technical analysis for the Carp River Restoration and related issues as outlined in correspondence from the City of Ottawa to Sarah Paul of your office on April 22, 2008.

Technical advice regarding flood plain management aspects of the Carp River Restoration project is the responsibility of the Mississippi Valley Conservation (MVC) who have delegated responsibility for flood plains and other natural hazards from the Minister of Natural Resources. On this basis, the Ministry of Natural Resources has no comments or requirements with respect to the draft Terms of Reference.

Please continue to keep us informed regarding this file.

Yours truly,

Alex Gardner
